

WLC has evolved to meet the demands of the 21st century by teaching math for everyday use, computer literacy, financial literacy, workforce skills, occupational literacy, and other necessary skills. We prepare our students for better jobs, continued education, and real opportunities by providing them with hands-on learning opportunities. As a learning center, our goal is to help DC residents and their families succeed.

116

graduates from
workforce/education programs

176

enrollees in
WLC workforce

216

TANF participants advancing
toward independence

20
